08029, Barcelona

Education

Finishing my Degree in Informatics Engineering at Facultat d'Informàtica de Barcelona, UPC.
(Completed 222 of 240 ECTS)

Work experience

Telespazio Ibérica

Junior programmer (internship)

November 2022 – March 2023

Objective

I am a last year student at FIB. I enjoy programming and carrying out software projects as part of a team.

I took my third year at Politecnico di Milano, in Italy, thanks to the Erasmus programme.

I am currently seeking a programming position in a company where I may also develop my Degree Final Project (TFG).

My main objective as a professional is to learn about the most promising new technologies and those most in use today; as well as developing my project development skills.

Languages

- **Spanish and Catalan:**
Native
- **English:** High level in speaking, listening, writing, and reading (C2 level)
 - Certificate: C1
 - TOEFL score: 110 out of 120
- **Italian:** very basic

Date of birth

29 December 2000

Nationality

Spanish

Languages and Technologies

Educated in:

- C
- C++
- Java
- Android and Kotlin
- Flutter and Dart
- SQL and databases (PostgreSQL and Oracle)

Have also worked with:

- x86
- .NET and C#
- Unity
- Ruby (on Rails)
- Python

Knowledge in

- Git, Gitflow
- REST APIs
- Agile project management (Scrum)

Soft Skills

- Teamwork
- Commitment in projects
- Perfectionism

Relevant projects

Web application: *Interfaz SIE*

Junior backend programmer: development of features and bugfixes

Web application developed in .NET and Oracle following the MVC pattern, which interacts with external agents through the use of SOAP. For the client Enel (Endesa), at Telespazio Ibérica.

November 2022 – February 2023

Migration of the *Interfaz SIE* database from Oracle to PostgreSQL

Junior backend programmer

Manual translation of PL/SQL scripts into PL/PgSQL scripts; at Telespazio Ibérica.

February – March 2023

Social network for safely organizing and joining outdoors activities during the pandemic: *OFF-Home*

Frontend developer

Android application developed using Kotlin, with a backend developed using JavaScript; as part of a team consisting of 4 frontend programmers and 3 backend programmers using Scrum methodology and Gitflow. It also uses Firebase for user authentication. Developed for the *Software engineering Project* course at FIB, UPC.

February - June 2021
